Microsoft 70-483

Programming in C#
Version: Demo 20.0

QUESTION NO: 1

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are in the process of creating a new ABC.com application. You have written code that includes the Console.Readline method.

Which of the following is TRUE with regards to the Console.Readline method?

A. It reads the next line of characters from the standard input stream.
B. It reads the next character from the standard input stream.
C. It reads the next line of characters from the customized input stream.
D. It reads the next character from the customized input stream.

Answer: A

QUESTION NO: 2

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the WaitForFullGCApproach method.

Which of the following is TRUE with regards to the WaitForFullGCApproach method?

A. It is used to return the status of a registered notification for determining whether a full, blocking garbage collection by the common language is pending.
B. It is used to return the status of a registered notification for determining whether a full, blocking garbage collection by the common language runtime has completed.
C. It is used to return the status of a registered notification for determining whether a full, blocking garbage collection by the common language runtime has completed in a particular time-out period.
D. It is used to return the status of a registered notification for determining whether a full, blocking garbage collection by the common language runtime is pending in a particular time-out period.

Answer: A

QUESTION NO: 3

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are in the process of creating an assembly for ABC.com, which will be utilized by various ABC.com applications. Upon completion of the new assembly, you have to install it in the Global Assembly Cache (GAC).

Which of the following actions should you take?

A. You should consider making use of dtexecui.exe from the command prompt.
B. You should consider making use of gacutil.exe from the command prompt.
C. You should consider making use of dtutil.exe from the command prompt.
D. You should consider making use of dbimpexp.exe from the command prompt.

Answer: B

QUESTION NO: 4

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the use of the HashTable collection type.

Which of the following is TRUE with regards to the HashTable collection type?

A. It represents a first in, first out (FIFO) collection of objects.
B. It represents a last in, first out (LIFO) collection of objects.
C. It represents a collection of key/value pairs that are organized based on the hash code of the key.
D. It represents a list of objects that can be accessed by index.

Answer: C

QUESTION NO: 5

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are in the process of creating a new ABC.com application. You have written code that includes the Console.WriteLine method.

Which of the following is TRUE with regards to the Console.WriteLine method?

A. It writes the identified data, followed by the current line terminator, to the standard output stream.
B. It writes the text representation of the identified value or values to the standard output stream.
C. It writes the identified data, followed by the current line terminator, to a customized output stream.
D. It writes the text representation of the identified value or values to a customized output stream.

Answer: A

QUESTION NO: 6

You work as a developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing a method of the StringBuilder Class that attaches the default line terminator to the end of the current StringBuilder object.

Which of the following is the method being discussed?

A. The AppendLine(String) method.
B. The AppendLine() method.
C. The AppendFormat(String, Object) method.
D. The Append(Object) method.

Answer: B

QUESTION NO: 7

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the ExtensionMethods class.

Which of the following is TRUE with regards to the ExtensionMethods class? (Choose all that apply.)

A. It allows you to add methods to current types by modifying the original type.
B. Methods of the class are a special kind of static method that is called as if they were instance methods on the extended type.
C. It allows you to add methods to current types by recompiling.
D. Methods of the class are a special kind of instance method that is called as if they were static methods on the extended type.
E. It allows you to add methods to current types without creating a new derived type.

Answer: B,E

QUESTION NO: 8

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the use of the Private access modifier to specify the declared accessibility of a member or a type.

Which of the following is TRUE with regards to the Private access modifier?

A. It only allows access to the containing class or types derived from the containing class.
B. It only allows access to the current assembly.
C. It only allows access to the current assembly or types derived from the containing class.
D. It only allows access to the containing type.
E. It allows unrestricted.

Answer: D

QUESTION NO: 9

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the DataContractSerializer class.

Which of the following is TRUE with regards to the DataContractSerializer class?

A. It is used to serialize and deserialize instances of a type into an HTML stream.
B. It is used to serialize and deserialize instances of a type into an SSL stream.
C. It is used to serialize and deserialize instances of a type into a TLL stream.
D. It is used to serialize and deserialize instances of a type into an XML stream.

Answer: D

QUESTION NO: 10

You work as a senior developer at ABC.com. The ABC.com network consists of a single domain named ABC.com.

You are running a training exercise for junior developers. You are currently discussing the use of a collection type that represents a doubly linked list.

Which of the following is the collection type being discussed?

A. The List<T>collection type.
B. The SortedList<T> collection type.
C. The SortedSet<T> collection type.
D. The LinkedList<T> collection type.

Answer: A
